Project –

Airline Data Management and Analysis Using Power BI

Task 1

Data Preparation and Cleaning

Solution Steps –

"First, I open each Excel sheet in Power BI Query Editor. Then, I check for data inconsistencies. After that, I remove duplicates from each dataset one by one. I handle missing values by replacing errors or nulls using 'Replace Values' or filters. Finally, I format the column data types properly, such as setting dates, text, or whole numbers accordingly."

	TicketID	FlightID	BookingStatus
1	5001	1178	Pending
