Project –

Airline Data Management and Analysis Using Power BI

Task 5th

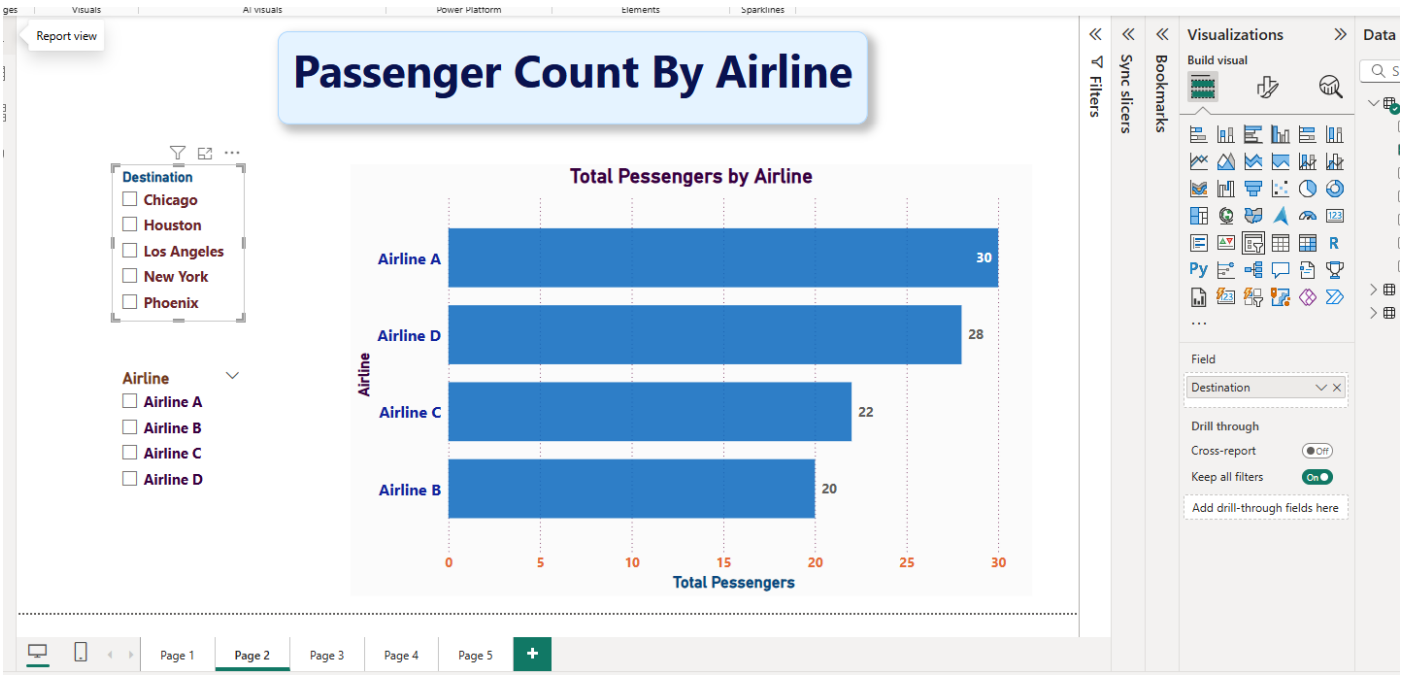
Visualization and Interactive Features

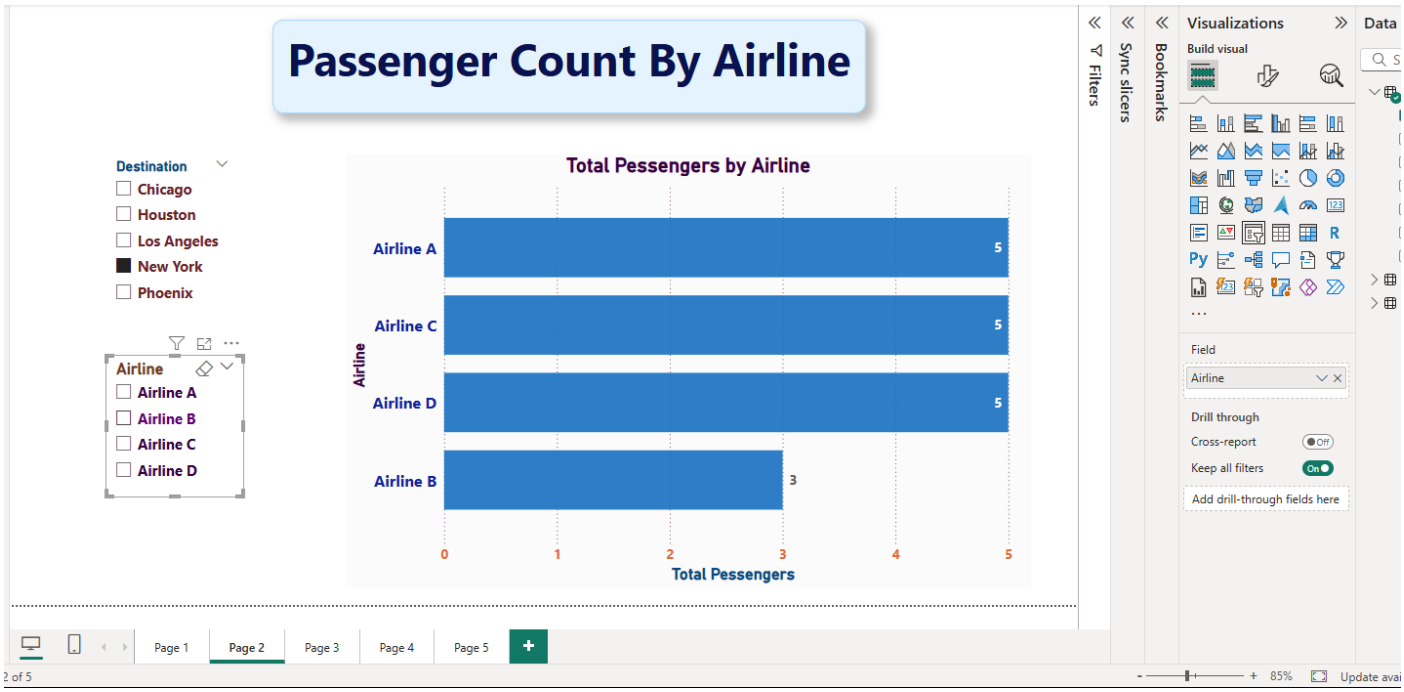
1. Create Visuals For

Q. 1. **Passenger count by airline.**

Solution Steps –

"For the visualization, I inserted a bar chart, then dragged 'Airline' from the Flight_Information table and 'Total Passengers' from Passenger_ID into the values. The result is shown in the image below."

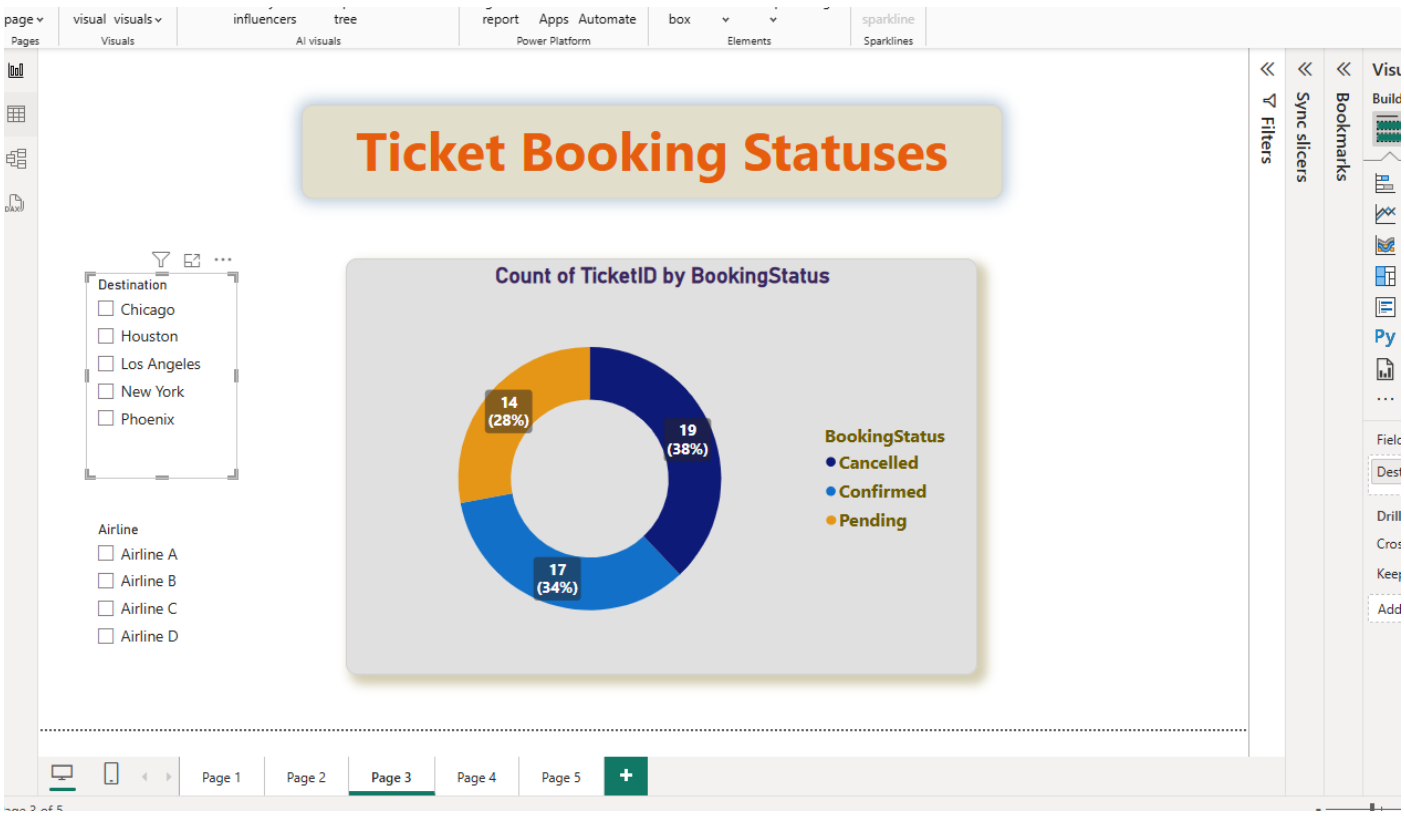




Q. 2. **Ticket booking statuses.**

Solution Steps –

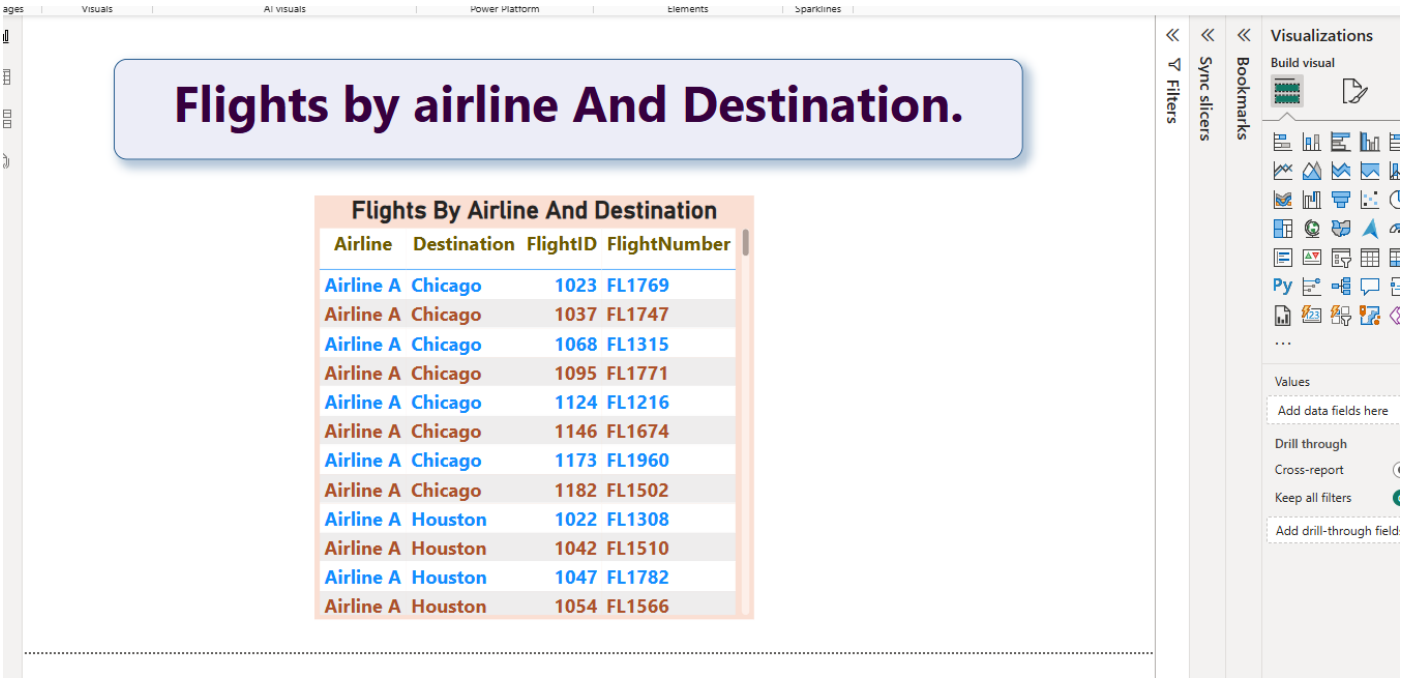
"To show the ticket booking statuses, I inserted a donut chart, dragged 'Booking Statuses' from the Ticket_Information table into the fields, and 'Count of Ticket_ID' into the values. Then, I adjusted the colors and fonts to create the best visual."



Q. 3. **Flights by Airline and Destination.**

Solution Steps –

"To show the Flights by airline and destination, I inserted a Table and dragged in Rows 'Airline' and in columns 'Destination' Then, I adjusted the colors and fonts to create the best visual."



Add interactive features for:

Destination and Airline.
Quick views.
Airline-specific pages.

Solution Steps –

"For a quick view, I placed all the visuals on one page, then inserted an Airline slicer and a Destination slicer for easier filtering. I also added a bookmarks button and adjusted everything to fit the dashboard layout for better clarity. The result is shown in the image below."
